

Mind, Body Soul Project

BRANDY WHITE

MBS

FALL 2021

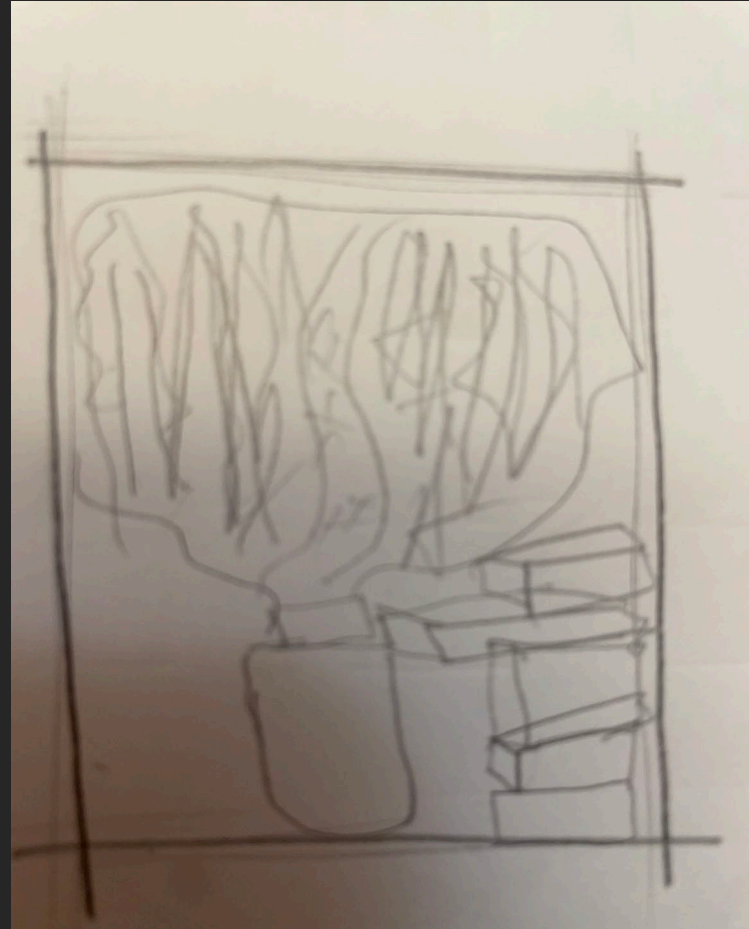

ART260C INTO TO DIGITAL MEDIA

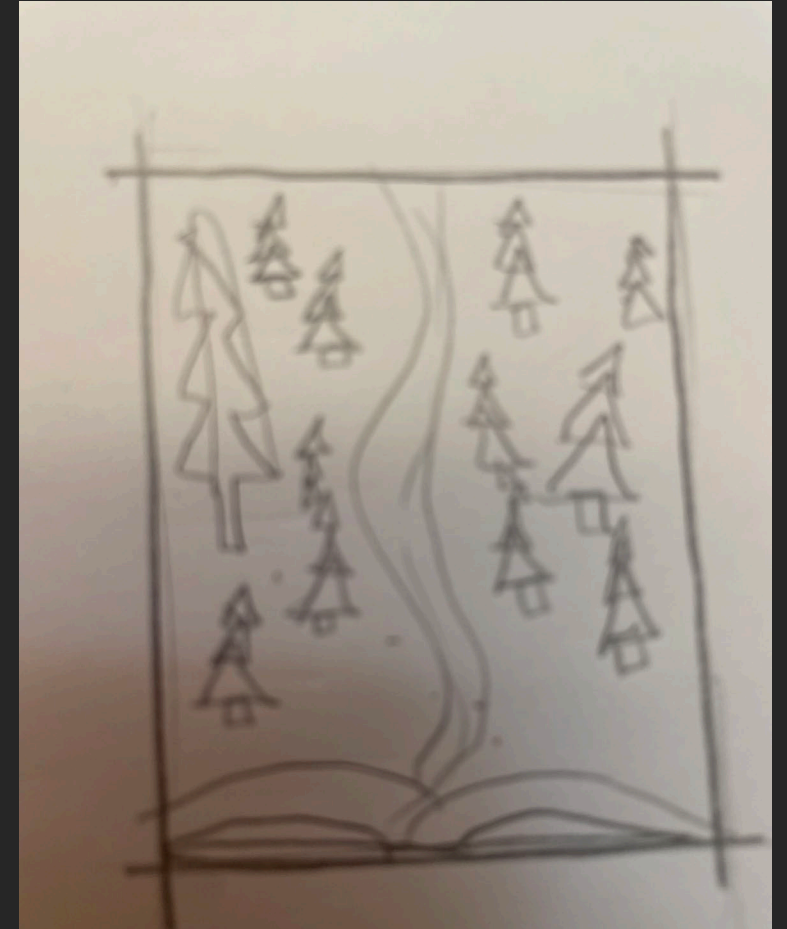

Research – Mind

Word List

- Strong headed, overthinker,
Distracted, intelligent, reader,
overwhelmed

For my ideas I wanted to do more of an opening pandoras box type of look into my mind with some crazy stacks of books.

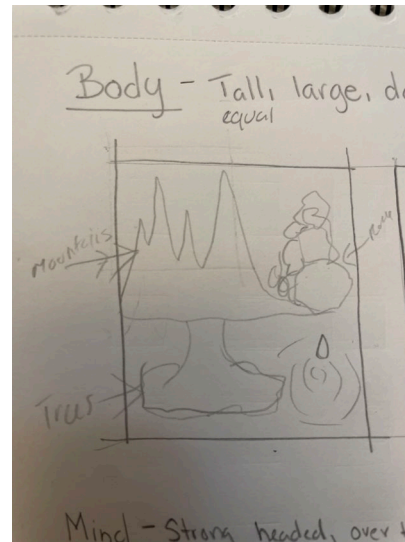

For my second one I wanted to do more of an open story book with a jumbled land to show my mind is a cluttered yet open book.

Research - Body

Word List

Tall, strong, large, dark, useful,
hardworking, air head

For this design I wanted to show large natural things like mountains, Large trees, unmovable rock formations, and deep water.

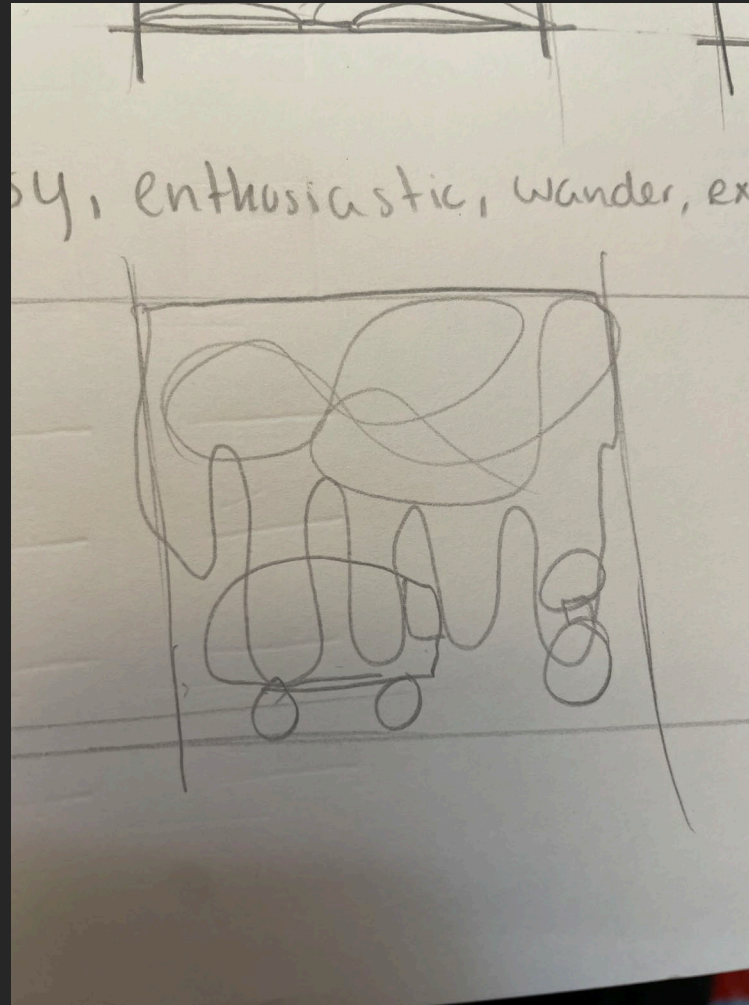

On this Idea I wanted to center a large Sequoia to show my hometown in my project, being surrounded by large unmovable rocks and clouds to show height.

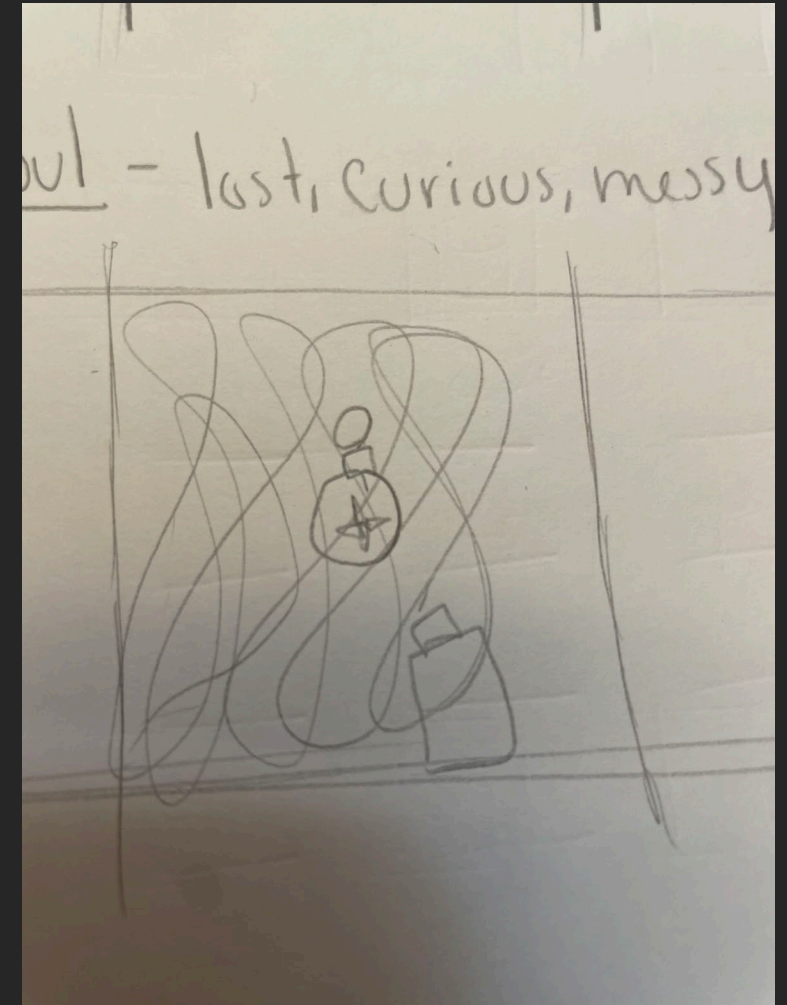

Research - Soul

Word List

- Lost, curious, messy, enthusiastic, wanderer, adventurer

For this design I wanted to do a sort of dripping with a bunch of adventures things at the bottom.

For this design I want with a splatter paint Background. The compass, a map and a Airplane.

Initial Design - Mind

For this design I wanted to incorporate lots of clouds to show a more “head in the clouds” look, I did the stack of drums to show both the loudness that I feel in my head, the rock formation to show my stubbornness. The background of ocean and the train going into the rock to show my train of thought.

Initial Design - Body

For this design I wanted to show the large mountain range for the largeness, however I am more than just my largeness and I placed clouds to show height and depth of the water to show the I'm more than what meets the eye.

Initial Design - Soul

- For this design I wanted to make sure to add all the things that I love such as painting, traveling such as with the compass and my new passion of photography. I also placed the Hollywood sign to show how I'm always thinking of home. I also placed a green marble background to show my often scrambled thought process.
